Higher Secondary
R.D. Public School.

Address: Kala Patha, near kali chattan Betul., 460001 BETUL (India)
Website: http://rdpsbetul.org/

Graduation
JH GOVT PG COLLEGE

Address: civil lines, Betul., 460001 BETUL (India)

PROJECTS

SECONDMEDIC

Second Medic is a medical second opinion service that brings the best, brightest and most talented doctors who have trained in the most prestigious medical institutes across the world and bring the benefits of their expertise to the people of India.

In the project, we aim to provide access to a world-class medical second opinion to people who are worried about their health and want to be sure that they are receiving the right treatment for the right diagnosis. Technology: Android, IOS, and PHP

Roles & Responsibility: –

1. Writing and executing test cases
2. Issue reporting and issue dashboard creation
3. Understand and implement client requirements and explain them to the development team
4. Day-to-day reporting of activities to manager and client
5. Captured and tested all modifications to proposed functional requirements.
6. Met all project timelines and deadlines.
7. Assisted clients and team in producing high-quality applications

Donation Domain Dashboard

In this project, any person can donate any amount for donations categories in Muslim communities have as Zakat, Harta, Fitrah & Fidyah. Users can use POS installed in Masjids and donate using web applications using credit/Debit Cards. Amils and Payers can see the amount they have donated and the total donations they have paid or received under different categories. Also, users can Raise a Refund of the amount of the donation he/she has paid. And supervisor and Amil can process the further application through the website and accept or reject the refund raise application.

Roles and Responsibilities in this project :

1. Conducted user acceptance testing to ensure that developed systems satisfied the needs of business clients as specified in the functional requirements.
2. Designed, developed, and implemented user acceptance testing protocols as the final phase of application development.
3. Captured and tested all modifications to proposed functional requirements.
4. Met all project timelines and deadlines.
5. Assisted clients and teams in producing high-quality applications.

ChatBot Mobile Application

In this project, users can send and receive messages using WhatsApp from the business by saving the contact information of the various business which have this chatbot developed. The user sends the desired input and gets the output based on the requirements. Workflow is given for the chatbot application and the user needs to check whether he is receiving valid output and gets validations in case of invalid inputs.

Roles and Responsibilities in this project :

1. Conducted user acceptance testing to ensure that developed systems satisfied the needs of business clients as specified in the functional requirements.
2. Designed, developed, and implemented user acceptance testing protocols as the final phase of application development.
3. Captured and tested all modifications to proposed functional requirements.
4. Met all project timelines and deadlines.
5. Assisted clients and team in producing high-quality applications.

RESPONSIBILITIES

•

• Analyzed the Business Requirements document and have written Test Cases.

• Preparing Test Scenarios and Test plans, Understanding documents with Business Requirements, design documents as inputs.

• Analyzed and provided proper estimates of the Business Requirements.

• Provide a daily/weekly project report that includes status reports.

• Ensure traceability of test cases back to Business requirements.

• Involved in Functional, Regression, and User Acceptance Testing.

• Analyzing the Test Cases prepared by other team members.

• Preparing Suggestion Documents to improve the quality of the application.

• Worked with cross-functional teams to ensure quality throughout the software development lifecycle

FUNCTIONAL

Experience and Skills

• Manual testing of web-based applications and mobile apps as well (iOS and Android).

• Functional testing, Regression testing, Database testing, and Data integrity & Business rule conformance.

• Experience in writing Test Plans, Defining Test Cases and interacting with developers in fixing errors.

• Ability to work in a team environment or independently.

• Good Experience in Software Development Life Cycle (SDLC) and basic concepts of development

• Well-versed with concepts of STLC and Defect Life Cycle

• Good Experience in Test Execution.

• Manual test case preparation

STRENGTHS

Time-management

Able to divide my time in the most optimal way possible.

Life-long Learner

Never done learning and always seeking to improve me. Curious about new possibilities and taking action to explore them.

Interpersonal Skills

Aware of the social expectations of the working place and team interaction dynamics.

ORGANISATIONAL SKILLS

MANUAL TESTING

SYSTEM TESTING

TEST CASE CREATION/EXECUTION

BVA & ECP

FUNCTIONAL, REGRESSION, SYSTEM, SMOKE, & BLACK BOX TESTING.

MOBILE APPLICATION TESTING ON BOTH ANDROID AND IOS DEVICES

I hereby declare that all the information stated above is fact and true to my knowledge and I take all responsibility for all the above information. (Aklim Khan)
